

## EXERCISES:

1. Setup the VM (for instructions select Virtual Machine from the left sidebar or check [here](#)):
  - Download the image
  - Create the course VM

2. \_\_\_\_\_

### Cluster Computing:

- Start the course VM
- Write small pbs scripts
- Submit jobs using the pre-installed batch scheduler
- Check job status
- Inspect job output

3. \_\_\_\_\_

### Acquaintance:

- Go through the Glossary (Lecture 5) and try to familiarize yourself with basic Grid terms. Things that seem daunting at first will become clear later when you do the hands-on part.
